COVID-19 Update “SAFER AT HOME”

March 23, 2020

As the current coronavirus (COVID-19) situation continues to evolve, and local governments and municipalities across the country issue various ***Safer at Home Orders***, Three Way Logistics remains operational. Our services at Three Way are deemed essential because we provide shipping and transportation services to other service sectors. We plan to operate as normal based on the needs of our customers including warehousing, transportation and rigging services.

While working to ensure we meet the needs of all our customers, Three Way’s priority is maintaining a healthy and safe work environment for our employees and community. Some of the steps we are taking include:

- Activating and executing appropriate parts of our business continuity plan to deal with this disruption
- Utilizing temporary telework arrangements for positions where working remotely is possible
- Educating employees about the coronavirus, including its symptoms and risks, and mitigating steps recommended by relevant health authorities
- Contingency planning for operations and supply-chain disruptions that may occur due to travel restrictions in affected areas
- Implementing “semi isolation” for all our dispatch, drivers and warehouse staff by following “Safer at Home” and “Social Distancing Guidelines”
- All drivers are following prescribed guidelines for accessing customer premises

We feel deeply for those who have been affected and recognize this situation remains very unpredictable. The safety of our colleagues, our customers, our families and the community at large continue to be our utmost priority. Three Way is committed to helping and will continue to be your logistics service provider during this pandemic. Please feel free to contact us for any emergency needs.
